

ANALYZING AMAZON DATA

E-commerce company

INTRODUCTION

Company Name- : Amazon Company
Founded- : on July 5, 1994
Headquarters- : Seattle, Washington,. United States.

AMAZON is an American multinational technology company, engaged in e-commerce, cloud computing, online advertising, digital streaming, and artificial intelligence. It is considered one of the Big Five American technology companies, the other four being Alphabet, Apple, Meta, and Microsoft. Amazon was founded on July 5, 1994, by Jeff Bezos in Bellevue, Washington. The company originally started as an online marketplace for books but gradually expanded its offerings to include a wide range of product categories. This diversification led to it being referred to as "The Everything Store".

Write queries for the following questions:

03

1. List all products with a discounted price below ₹500.
2. Find products with a discount percentage of 50% or more.
3. Retrieve all products where the name contains the word "Cable".
4. Display the difference between the average of the actual price and the discounted price for each product.
5. Query reviews that mention "fast charging" in their content.
6. Identify products with a discount percentage between 20% and 40%.
7. Find products that have an actual price above ₹1,000 and are rated 4 stars or above.
8. Find products where the discounted price ends with a 9.
9. Display review contents that contains words like worst, waste, poor, or not good.
10. List all products where the category includes "Accessories".

List all products with a discounted price below ₹500.

SYNTAX

```
select *
from mytable
where discounted_price < 500;
```

PURPOSE

This query helps identify products that are being sold at a discounted price of less than Rs 500, providing insights into which lower-priced items might be driving customer attention. Management can use this to:

- Target promotions or marketing efforts toward such discounted products.
- Monitor the performance of discounted products and adjust pricing strategies accordingly.
- Understand customer preferences for lower-priced goods and stock up on products in high demand.

Identify products with a discount percentage between 20% and 40%.

SYNTAX

```
select product_id,
product_name,
discount_percentage
from mytable
where discount_percentage
between 0.20 and 0.40;
```

PURPOSE

The query identifies products that have a discount percentage ranging from 20% to 40%. These products offer a moderate discount, which could attract price-sensitive customers while maintaining some margin for the business.

By analyzing this data, you can understand the volume of products that fall into this discount range and assess whether this pricing strategy is yielding desirable sales results or requires adjustments based on performance trends.

Find products where the discounted price ends with a 9.

SYNTAX

```
select product_id,
product_name, discounted_price
from mytable where discounted_price like "%9";
```

PURPOSE

The management will receive a list of products where the discounted price ends in 9, a common pricing strategy used in retail (known as "charm pricing"). This can provide insights into how such pricing patterns may impact customer purchase behavior. For example, if you find that many products are priced at ₹199, ₹299, ₹499, etc., you can analyze their performance to understand whether this pricing strategy is influencing sales
